Internship Project

InnovativeKrish | FullStack Intern   **May 2024 - Nov 2024**

- GitHub | React| Tailwind | Typescript | JWT | NestJS | Prisma | PostgreSQL

    I successfully completed a Full Stack Developer internship, where I contributed to building an e-commerce platform for a leading computer solutions provider with 25 years of experience. The project featured an e-billing system, advanced inventory management, a lead-based workflow, and seamless purchasing, sales, and warehouse management. The platform also included robust reporting tools, enhancing operational efficiency and supporting organizational growth.

Freelance Projects | multitechpanasonic.com   **Dec 2024 - Feb 2025**

- GitHub | Reactjs | Nestjs | Postgresql | JWT | Prisma | Typescript | OVHCloud •
Designed and implemented a robust management system for a Panasonic service company, addressing operational inefficiencies by reducing inventory discrepancies by 30% and streamlining job card management to improve service tracking. The solution also optimized vendor and customer management processes and provided actionable insights through analytics.

PersonalProjects | CampusCraze

- GitHub | React | Express.js | Mongodb | JWT | Cloudinary | Bcrypt | Multer | Resend | Render | Vercel • Campus Craze is a groundbreaking web application aimed at enhancing the campus experience at Thakur College of Science and Commerce (TCSC). It serves as a centralized platform facilitating seamless communication, event management, and project coordination among students, faculty, and administrators. This innovative solution promotes organizational efficiency and fosters a vibrant campus culture at TCSC.
